**Prospex Oil and Gas's Investing Policy adopted 11 May 2016**

The Company's Investing Policy is to invest in and/or acquire companies and/or projects within the natural resources and/or energy sector with potential for growth and/or income. The Company may also directly apply for new exploration licences or invest in existing licences. It is anticipated that the geographical focus will primarily be Europe, however, investments may also be considered in other regions to the extent that the Directors consider that valuable opportunities exist and returns can be achieved.

In selecting investment opportunities, the Directors will focus on businesses, assets and/or projects that are available at attractive valuations and hold opportunities to unlock embedded value. Where appropriate, the Directors may seek to invest in businesses where it may influence the business at a board level, add their expertise to the management of the business, and utilise their significant industry relationships and access to finance; as such investments are likely to be actively managed.

The Company's interests in a proposed investment and/or acquisition may range from a minority position to full ownership and may comprise one investment or multiple investments. The proposed investments may be in either quoted or unquoted companies; be made by direct applications, acquisitions or farm-ins; and may be in companies, partnerships, earn-in joint ventures, debt or other loan structures or direct or indirect interests in assets, projects or licences. The Directors may focus on investments where intrinsic value can be achieved from the restructuring of investments or merger of complementary businesses.

The Directors expect that investments will typically be held for the medium to long term, although short term disposal of assets cannot be ruled out if there is an opportunity to generate an attractive return for Shareholders. The Directors will place no minimum or maximum limit on the length of time that any investment may be held.

There is no limit on the number of projects into which the Company may invest, and the Company's financial resources may be invested in a number of propositions or in just one investment, which may be deemed to be a reverse takeover under the AIM Rules. The Directors intend to mitigate risk by appropriate due diligence and transaction analysis. Any transaction constituting a reverse takeover under the AIM Rules will also require Shareholders' approval. The Directors consider that as investments are made, and new promising investment opportunities arise, further funding of the Company may also be required.

Where the Company builds a portfolio of related assets it is possible that there may be cross holdings between such assets. The Company does not currently intend to fund any investments with debt or other borrowings but may do so if appropriate. Investments in early stage assets are expected to be mainly in the form of equity, with debt potentially being raised later to fund the development of such assets. Investments in later stage assets are more likely to include an element of debt to equity gearing. The Directors may also offer new Ordinary Shares by way of consideration as well as cash, thereby helping to preserve the Company's cash for working capital and as a reserve against unforeseen contingencies including, for example, delays in collecting accounts receivable, unexpected changes in the economic environment and operational problems.

The Directors will conduct initial due diligence appraisals of potential business or projects and, where they believe further investigation is warranted, intend to appoint appropriately qualified persons to assist. The Directors believe they have a broad range of contacts through which they are aware of various opportunities which may prove suitable, although at this point only preliminary due diligence has been undertaken. The Directors believe their expertise will enable them to determine quickly which opportunities could be viable and so progress quickly to formal due diligence. The Company will not have a separate investment manager. The Company proposes to carry out a comprehensive and thorough project review process in which all material aspects of a potential project or business will be subject to rigorous due diligence, as appropriate. Due to the nature of the sector in which the Company is focused it is unlikely that cash returns will be made in the short to medium term; rather the Company expects a focus on capital returns over the medium to long term.

The Company will undertake an acquisition or acquisitions within the natural resources and/or energy sector, which constitutes a reverse takeover under AIM Rule 14 of the AIM Rules for Companies within 12 months of the date of the general meeting.
